QA Tester experienced in manual and functional testing who also designs and builds websites and Python tools. I bring a tester's eye for edge cases, clear documentation and closing the loop on defects, combined with the perspective of someone who builds the product. Information Systems Engineering student at UTN, with advanced English (Cambridge C1).

EXPERIENCE

QA Intern · A1QA International — 2026 – Present

- Analyze requirements to identify test scenarios, edge cases and risks before testing begins.
- Design and execute functional test cases for new and existing features.
- Run regression testing and re-testing to verify fixes ahead of each release.
- Partner with developers to track defects through to resolution.

Junior QA Tester — 2024 – 2025

- Performed manual testing of new and existing features based on functional requirements.
- Detected, reproduced and reported bugs with clear steps, expected results and supporting evidence.
- Documented defects and the results of each test cycle.

Founder & Technical Lead · Codexa Studio — 2026 – Present

- Run a web development studio serving Spanish- and English-speaking clients: custom websites, React, Python / Flask and WordPress.
- Built a bilingual landing page with a live quote calculator (USD, ARS, EUR), meeting scheduler and internal management dashboard.

Independent Venture · Mollica e Moka — 2025 – Present

- Developed the pre-launch landing page with a live countdown, full menu and custom checkout flow, plus an AI agent for the brand.
- Manage day-to-day operations: advertising and social media, inventory and staff.

PROJECTS — details and screenshots in my portfolio

Nova · Python · Vosk · AI
Personal voice assistant that runs on PC and controls an Android phone. Offline Spanish speech recognition at zero running cost.

Urban Streetwear · HTML · CSS · JS
8-page online store with a working cart and search built without frameworks, explored across 5 color systems.

L'Atelier Bistro · HTML · CSS · JS
Website for a restaurant in Martínez, featuring real video footage and a full menu the client can edit without touching code.

Codexa HQ · internal dashboard
Studio control panel covering clients, projects, finances, tasks and marketing, designed as an Android app.

EDUCATION

Information Systems Engineering — UTN — 2026 – 2030 · in progress

Programming Technician Degree — UTN (Online) — Mar 2025

High School Diploma, Social Sciences (Bilingual) — St. Trinnean's — 2015 – 2021

CERTIFICATIONS

Data Scientist (Python) — Talento Tech — 2026

SAP BASIS — UTN (Online) — May – Jul 2026

English — Cambridge CAE (C1) · FCE · PET — 2021 · 2019 · 2018

SKILLS

Testing: manual QA, test case design, functional and regression testing, bug reporting, technical documentation, Jira.

Development: HTML, CSS, JavaScript, React, Python, Flask, Git.

Data: Python for data science, SQL, MySQL, PostgreSQL.

Tools: Azure, Microsoft 365, Google Workspace.

Familiar with: C#, C++, Rust, Spring Boot, Unity, Unreal Engine.

Soft skills: teamwork, communication, attention to detail, analytical thinking, time management.
